ABOUT

I’m Amir Jebbari, the founder of Jebbari, based in Amsterdam and Zwolle. I build web applications with Laravel, from the first idea to a product that runs. Next to client work I build my own products. ServerScope is the biggest one: monitoring for servers and domains. It taught me what it takes to run software, not just write it.

PROJECTS

ServerScope · serverscope.nl

ServerScope is a monitoring platform for servers, websites, domains and scheduled jobs. A lightweight agent sends server metrics, websites and domains are checked from the outside, and problems become incidents with a timeline and a root cause analysis.

Laravel · Livewire · Python · Bash · MySQL · Tailwind CSS · Chart.js · Web Push

BarberCuts · barbercuts.nl

BarberCuts is a platform for barbershops in the Netherlands. A shop signs itself up and manages appointments, a calendar per barber, customers and revenue in one app. Customers book through the shop’s own page, with or without an account.

Laravel · Livewire · Filament · Tailwind CSS · MySQL · Redis · Mollie · PWA

Jebbari · jebbari.nl

About Jebbari Independent thinking. Thoughtful design. Software built to last. Jebbari is an independent digital studio based in Zwolle, the Netherlands, focused on designing, developing and delivering modern digital experiences. We work at the intersection...

PHP · Laravel · Blade · Tailwind · Alpine.js · Vite · MySql · Filament · Git · Linux · Nginx

ReviewsPilot · reviewspilot.nl

Laravel

JungleTuinen · jungletuintje.newdeveloper.nl

Jungletuinen is a website about creating your own jungle garden: featuring inspiration, a step-by-step guide (structure, plants, soil, layers, maintenance), photos, a map with locations in Zwolle, and a contact page. The idea is to help visitors transform thei...

HTML · CSS · JavaScript · Vue3

JF cuts · jfcuts.nl

JF Cuts JF Cuts is a modern, mobile-first web application for managing and booking appointments at a barbershop. The project is built with Laravel, PHP, Blade, Livewire, Tailwind CSS and MySQL. Customers can easily create an account, choose a service, select a...

Laravel · PHP · MySQL · Livewire · Blade · Tailwind CSS · Git

Irooni · irooni.nl

Irooni is a digital magazine about Iran and Persian culture: history, architecture, poetry, food, language and the Iranian diaspora. It appears in three languages, with a full Persian edition that reads from right to left.

Laravel · Blade · Tailwind CSS · Vite · Markdown · i18n · RTL
